

CardValet

Introducing CardValet!

We are excited to bring our clients a new service to assist with managing their debit cards! Seattle Bank has partnered with Fiserv to make available a new app for iOS and Android! With CardValet you will have control over your debit card. From setting your debit card spending limits while you're in line at the store, to security and peace-of-mind that your debit card can be declined if it's not close to you!

Features

- **Card usage controls:** Spending limits can be established to allow transactions up to a certain dollar value and decline transactions when amounts exceed pre-defined thresholds. Transactions can also be monitored or controlled for specific merchant categories such as gas, hotel, travel, restaurants, groceries or electronic stores
- **Card on/off setting:** When the card is "on," transactions are allowed in accordance with each cardholder's usage control settings. When the card is "off," no purchases or withdrawals are approved until the card is turned back "on." This control can be used to disable a lost or stolen card
- **Location-based controls:** The My Location control can restrict transactions to merchants located within a certain range of each cardholder's location (using the phone's GPS); transactions requested outside of the specified range can be declined
- **Interactive alerts:** CardValet can send a real-time alert when a card is used, when a transaction is approved and exceeds any of the permitted use policies, or when a card transaction has been attempted but is declined

Financial features: CardValet also enables cardholders to conduct limited card-related transactions wherever they are, any time of the day, including balance inquiries and locating ATMs

CardValet is available in the Apple App Store and for Android users, in Google Play!

Built for you
